UNIVERSAL SPACER FOR PROFILE

2. DESCRIPTION

This product is made of galvanized steel with a thickness of 1 mm. It is designed for use in the construction of clad gypsum counterwalls, offering wall spacing options of 60 or 120 mm. The bracket attaches to metal profiles using metal structure screws, ensuring a secure and stable installation.

3. USE

This product is used for mounting metal profiles in vertical, horizontal or inclined constructions of buildings. It is particularly suitable for the installation of plasterboard ceilings, allowing secure and adjustable attachment of profiles. The brackets are ideal for a wide range of applications in commercial, industrial, and residential buildings, where a reliable and versatile solution for handling complex interior and interior structures is required.
