PEGASUS PLUS CHANNEL 130 x 75

2. USE

Used for the collection and drainage of rainwater and the discharge of liquids for industrial use.
The combination with a wide range of gratings enables its use in pedestrian, driveway, road, motorway, port and airport environments.

3. SPECIFICATION ITEMS

Entry	Description	Unit	Price
Dak.D.POZ9x.1300Px	Supply and installation of drainage system type Pegasus Plus with PP clips with external stiffening ribs, male-female interlocking system between channels such as to allow assembly between one channel and the next with the relevant gratings already fixed. The gutter must have two lateral drainage diaphragms at pre-established points and a predisposition at the bottom for a possible drain. The surface of the gutter must be perfectly smooth and with a low roughness coefficient to allow maximum water flow; it must also be perfectly watertight and have no connection points with the outside. On the inside walls, the gutter must have 2 connection points on each side to ensure that the gratings are blocked. Dimensions 137 x 84 x 1000.....	-	-
