1. DATA AND DOCUMENTATION

DESCRIPTION

The Dakua+ Base Square line, is a shower channel with a modern design and perfect functionality, made of ABS for the one-piece channel body, siphon and positioning feet.

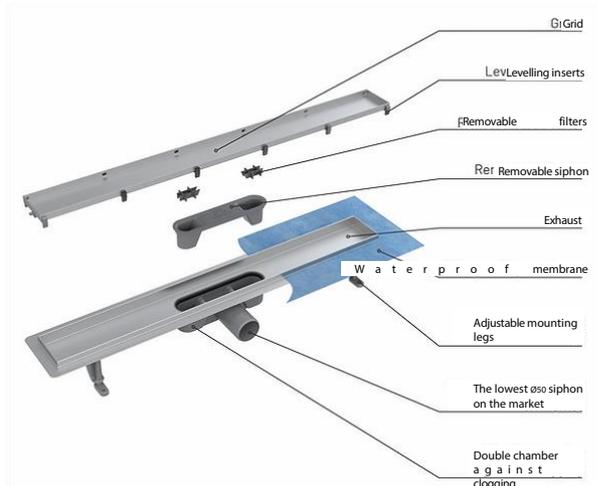

The channel body contains a siphon, a removable basket and a removable gasket that can be rotated 360°. The water drainage flow rate is high (44 l/min), albeit with lowered heights. The kit is complete, ready for installation, and also includes a pre-cut waterproof polyester sheet moulded to the channel edge against underfloor infiltration.

MATERIAL

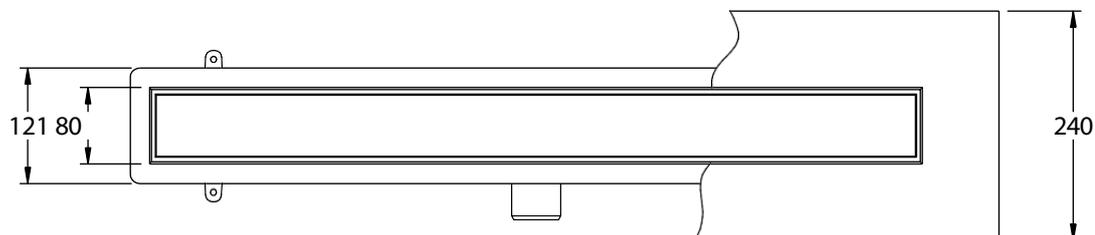

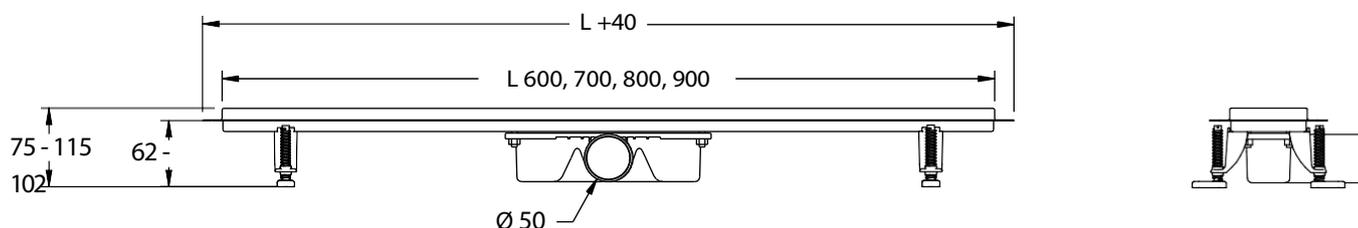

AISI 304 stainless steel grating, channel body, inspectionable odour trap (for cleaning) with EPDM rubber gasket and ABS hair catcher, waterproof polyester cloth cut to size for complete sealing.

2. USE

On the floor, for collecting waste water from showers, blending in with the flooring and enhancing the surface aesthetics.
